Please note that all information provided will be treated in strict confidence

Note: The medical profession takes the view that the parent's consent to medical treatment cannot be delegated. This view is explicit in the Children Act 1989. Thus medical consent forms have no legal status and a doctor/nurse insisting on the consent of a parent to particular treatment has the right to do so. However, it can be a comfort to medical staff to have a general consent in advance from parents or to have a leader on hand to sign forms required by medical authorities.
